

Just Brushing Up

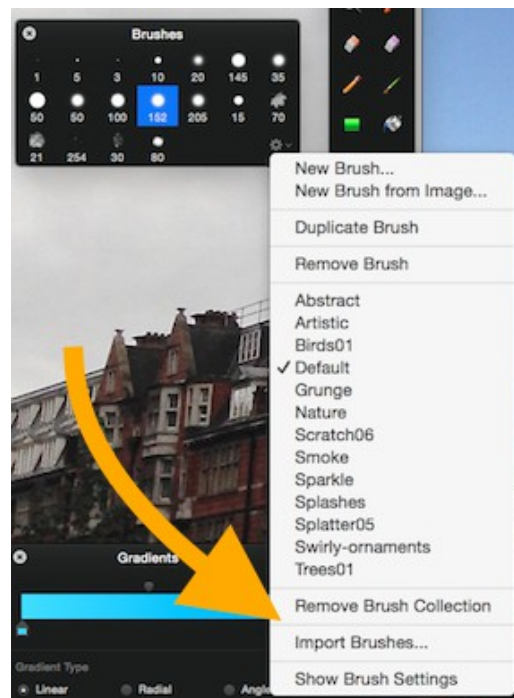

Did you know you can import Adobe® Photoshop® brushes into **Pixelmator** and use them just like the pre-installed brushes?

Simply download a brush package from any of numerous websites such as myPhotoshopBrushes.com, QBrushes, BrushKing, etc, then unzip it if necessary, to get to the *.abr* file.

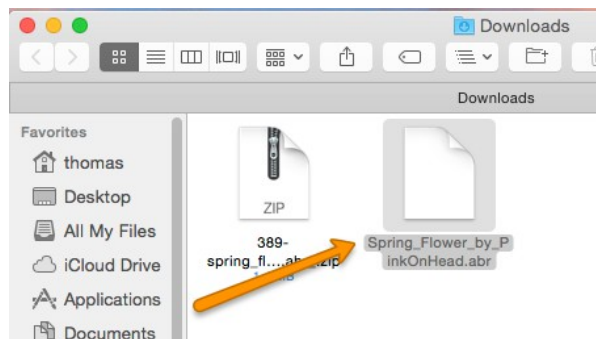

Open the Brushes pallet by double-clicking any of the brush tools in the Pixelmator toolbox or from the menu choose **View - Show Brushes**. Click the little Gear icon, ⚙️, in the bottom right corner of the pallet.

Now select **Import Brushes...** near the bottom of the menu.

In the **Open** dialog, locate the **.abr** file and click **Open**.

The new brush package should immediately appear in the list of available brushes, ready to use.

It's as simple as that!
